CONE WELDING NOZZLES

The cone welding nozzle is mainly used for systems where a simple length of hose is connected to a main duct and dropped from over head. The cone nozzle is clamped to the hose and the nozzle is positioned on the work table or a fixture, by means of the optional magnet. Please see the Series 5000 and 6000 Hose, which is commonly used for this type of simple application.

<u>Model</u>	<u>A</u>	<u>B</u>	<u>C</u>
23937	7"	11"	3"
23947	8"	12"	4"
