

The Monoxivent clamping tailpipe adapter is constructed of 600-degree neoprene rubber. The adapter is supplied with a spring tension clamping device. The spring clamp is attached to the adapter body, allowing a positive connection to the vehicle tailpipe. A simple squeeze on the spring clamp handles allows quick attachment to the tailpipe. The adapter can be removed by another simple squeeze or a direct pull on the adapter or hose. The clamping adapter can be used on all series hose.
